

Summit Global Investments Prospectus

SGI U.S. Large Cap Core ETF

(Ticker: NYSE Arca, Inc. – SGLC)

SGI Dynamic Tactical ETF

(Ticker: Nasdaq National Stock Market LLC – DYTA)

December 31, 2023

of The RBB Fund, Inc.

These ETFs are different from traditional ETFs.

Traditional ETFs tell the public what assets they hold each day. These ETFs will not. This may create additional risks for your investment. For example:

- You may have to pay more money to trade an ETF's shares. These ETFs will provide less information to traders, who tend to charge more for trades when they have less information.
- The price you pay to buy ETF shares on an exchange may not match the value of the ETF's portfolio. The same is true when you sell shares. These price differences may be greater for these ETFs compared to other ETFs because these ETFs provides less information to traders.
- These additional risks may be even greater in bad or uncertain market conditions.
- The SGI U.S. Large Cap Core ETF will publish on its website each day a "Proxy Portfolio" designed to help trading in shares of the ETF. While the Proxy Portfolio includes some of the ETF's holdings, it is not the ETF's actual portfolio.
- The SGI Dynamic Tactical ETF will publish on its website each day a "Portfolio Reference Basket" designed to help trading in shares of the ETF. While the Portfolio Reference Basket includes all the names of the ETF's holdings, it is not the ETF's actual portfolio.

The differences between these ETFs and other ETFs may also have advantages. By keeping certain information about an ETF portfolio secret, these ETFs may face less risk that other traders can predict or copy its investment strategy. This may improve the ETFs' performance. If other traders are able to copy or predict an ETF's investment strategy, however, this may hurt the ETF's performance.

For additional information regarding the unique attributes and risks of these ETFs, see "Principal Investment Risks-Semi-Transparent Structure Risk" in the Summary Sections and "Additional Information about the Funds-Semi-Transparent Structure Risk" below.

The Securities and Exchange Commission ("SEC") has not approved or disapproved these securities or passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

SGI U.S. Large Cap Core ETF

SUMMARY SECTION

Investment Objective

The SGI U.S. Large Cap Core ETF (for this section only, the “Fund”) seeks to provide long-term capital appreciation.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Fund Shares.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.85%
Distribution (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.00%
Total Annual Fund Operating Expenses	0.85%

⁽¹⁾ “Other Expenses” are estimated for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that: (1) your investment has a 5% return each year, and (2) the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$87	\$271	\$471	\$1,049

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. For the period from the Fund’s inception on March 30, 2023 to August 31, 2023, the Fund’s portfolio turnover rate was 95% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) and seeks to achieve its objective by investing under normal circumstances at least 80% of the net assets of the portfolio (including borrowings for investment purposes) in securities of large-capitalization companies, which the Fund considers to be those companies listed within the Russell 1000® Index or S&P 500® Index (the “Indexes”). The Fund’s investments will generally consist primarily of common stocks, but may also include preferred stocks, warrants to acquire common stock, and securities convertible into common stock. The Fund purchases equity securities traded in the United States on registered exchanges or the over-the-counter market. The Fund may also invest in other registered investment companies, including ETFs.

Summit Global Investments, LLC (the “Adviser”) attempts to achieve the Fund’s objective by investing in stocks that have strengthening business metrics (*i.e.*, earnings, debt, return on assets, competition, customers, industry, etc.) and favorable quantitative factors such as earnings variability, leverage, volatility, price/book, price/cash flow, etc. In addition, the Adviser reviews the idiosyncratic risks associated with each stock. The Fund may sell a stock if these risks are deemed elevated with increased downside risks due to social, environmental, legal, governance risks, and/or if the risk/return characteristics decline due to increasing risk and/or decreasing return potential. Further, the Fund may also decrease weight in an investment for risk control purposes.

Further, the Adviser may not sell from the portfolio a holding that the Adviser believes is likely to appreciate more than an Index solely because the market capitalizations of such holdings cause the portfolio to hold less than 80% of its net assets within these Indexes. As such, the Fund may, from time to time, hold less than 80% of its net assets within these Indexes.

In seeking to achieve its principal investment strategies, the Fund may engage in trading of portfolio securities that may result in a high portfolio turnover rate.

The Fund has elected to be, and intends to qualify each year for treatment as a regulated investment company (“RIC”) under Subchapter M of Subtitle A, Chapter 1, of the Internal Revenue Code of 1986, as amended (the “Code”).

Semi-Transparent Actively-Managed ETF with Proxy Portfolio Structure. The Fund is an actively-managed, semi-transparent ETF. Unlike traditional ETFs, which generally publish their portfolio holdings on a daily basis, the Fund discloses a portfolio transparency substitute—the “Proxy Portfolio”—and certain related information about the relative performance of the Proxy Portfolio and the Fund’s actual portfolio (“Actual Portfolio”) holdings (the “Proxy Portfolio Disclosures”). While the Proxy Portfolio includes some of the Fund’s holdings, it is not the Fund’s Actual Portfolio, and the Fund will not disclose the daily holdings of the Actual Portfolio. The Proxy Portfolio Disclosures are intended to help keep the market price of the Fund’s Shares trading at or close to the underlying net asset value (“NAV”) per Share of the Fund. Although the Fund seeks to benefit from keeping its portfolio information secret, market participants may attempt to use the Proxy Portfolio to identify the Fund’s trading strategy, which if successful, could result in such market participants engaging in certain predatory trading practices that may have the potential to harm the Fund and its shareholders. The Fund’s exemptive relief limits the types of securities in which the Fund can invest, which may constrain the Fund’s ability to implement its investment strategies.

Principal Investment Risks

Loss of money is a risk of investing in the Fund. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly from day to day and over time. You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments. The Fund’s principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

- **Convertible Securities Risk.** Securities that can be converted into common stock, such as certain securities and preferred stock, are subject to the usual risks associated with fixed income investments, such as interest rate risk and credit risk. In addition, because they react to changes in the value of the equity securities into which they will convert, convertible securities are also subject to the risks associated with equity securities
- **Cyber Security Risk.** Cyber security risk is the risk of an unauthorized breach and access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the Adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The Fund and the Adviser have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers and such third-party service providers may have limited indemnification obligations to the Fund or the Adviser. Successful cyber-attacks or other cyber-failures or events affecting the Fund or its service providers may adversely impact and cause financial losses to the Fund or its shareholders. Issuers of securities in which the Fund invests are also subject to cyber security risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cyber-failures.

- **Dividend-Paying Securities Risk.** The Fund may invest in dividend-paying securities may be subject to the risk that the company issuing such securities may fail and have to decrease or eliminate its dividend. In such an event, the Fund, may not only lose the dividend payout but the stock price of the company may fall.
- **Environmental, Social and Governance Investing Risk.** Environmental, social and governance (“ESG”) investing risk is the risk stemming from the ESG factors that the Fund may apply in selecting securities. The Fund seeks to screen out companies that it believes may have higher downside risk and lower ESG ratings, but investors may differ in their views of ESG characteristics. This may affect the Fund’s exposure to certain companies or industries and cause the Fund to forego certain investment opportunities. The Fund’s returns may be lower than other funds that do not use ESG ratings and/or screen out certain companies or industries. The Fund may invest in companies that do not reflect the beliefs and values of any particular investor.
- **Equity Risk.** The Fund’s investments in common stock are subject to market, economic and business risks that will cause their price to fluctuate over time. Therefore, an investment in the Fund may be more suitable for long-term investors who can bear the risk of these fluctuations. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **ETF Risk.** The Fund is an ETF, and, as a result of an ETF’s structure, it is exposed to the following risks: “Authorized Participants, Market Makers and Liquidity Providers Concentration Risk,” “Cash Transactions Risk,” “Limitations of Intraday Indicative Value (IIV) Risk,” “Secondary Market Trading Risk,” and “Shares May Trade at Prices Other Than NAV Risk.”

- o *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of financial institutions that are institutional investors and may act as authorized participants (“APs”). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. These events, among others, may lead to the Fund Shares trading at a premium or discount to NAV. Thus, you may pay more (or less) than the NAV when you buy Shares of the Fund in the secondary market, and you may receive less (or more) than NAV when you sell those Shares in the secondary market. A diminished market for an ETF’s shares substantially increases the risk that a shareholder may pay considerably more or receive significantly less than the underlying value of the ETF shares bought or sold. In periods of market volatility, APs, market makers and/or liquidity providers may be less willing to transact in Fund Shares. Further, the Fund is utilizing a novel and unique structure, which may affect the number of entities willing to act as APs, market makers and/or liquidity providers.
- o *Cash Transactions Risk.* Unlike traditional ETFs, the securities in the Fund’s basket of securities exchanged for a Creation Unit will not correspond pro rata to the positions in the Fund’s portfolio, and the Fund may effect its creations and redemptions partially or wholly for cash rather than on an in-kind basis. Because of this, the Fund may incur costs such as brokerage costs or be unable to realize certain tax benefits associated with in-kind transfers of portfolio securities that may be realized by other ETFs. These costs may decrease the Fund’s NAV to the extent that the costs are not offset by a transaction fee payable by an AP. Shareholders may be subject to tax on gains they would not otherwise have been subject to and/or at an earlier date than if the Fund had effected redemptions wholly on an in-kind basis.
- o *Limitations of Intraday Indicative Value (IIV) Risk.* The Exchange or a market data vendor intends to disseminate the approximate per share value of the Fund’s Proxy Portfolio every 15 seconds (the “intraday indicative value” or “IIV”). The IIV should not be viewed as a “real-time” update of the NAV per share of the Fund because (i) the IIV is not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day, (ii) the calculation of NAV may be subject to fair valuation

at different prices than those used in the calculations of the IIV, (iii) unlike the calculation of NAV, the IIV does not take into account Fund expenses, and (iv) the IIV is based on the Proxy Portfolio and not on the Fund's Actual Portfolio. The Fund, the Adviser and their affiliates are not involved in, or responsible for, any aspect of the calculation or dissemination of the Fund's IIV, and the Fund, the Adviser and their affiliates do not make any warranty as to the accuracy of these calculations.

- o *Secondary Market Trading Risk.* Although Shares are listed on a national securities exchange, the NYSE Arca, Inc. (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. Trading may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Fund inadvisable. These may include: (a) the extent to which trading is not occurring in the securities and/or the financial instruments composing the Proxy Portfolio and/or Actual Portfolio; or (b) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. During periods of market stress, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.
 - o *Shares May Trade at Prices Other Than NAV Risk.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although the Proxy Portfolio structure is intended to provide market participants with enough information to allow for an effective arbitrage mechanism that will help to keep the market price of the Fund's Shares at or close to the Fund's NAV, there is a risk that market prices for Fund Shares will vary significantly from the Fund's NAV. This risk is heightened in times of market volatility or periods of steep market declines. This risk may be greater for the Fund than for traditional ETFs that disclose their full portfolio holdings on a daily basis because the publication of the Proxy Portfolio does not provide the same level of transparency as the daily publication of the actual portfolio by a traditional ETF. This could cause the Fund's Shares to have wider bid/ask spreads and larger premiums/discounts than traditional ETFs using the same or similar investment strategies.
- **High Portfolio Turnover Risk.** Portfolio turnover risk is the risk that when investing on a shorter-term basis, the Fund may as a result trade more frequently and incur higher levels of brokerage fees and commissions and cause higher levels of current tax liability to shareholders of the Fund. A portfolio turnover rate of 100% is considered to be high. The Adviser may engage in active trading, and will not consider portfolio turnover a limiting factor in making decisions for the Fund.
- **Investment Companies and ETFs Risk.** The Fund's investment performance may be affected by the investment performance of the underlying funds in which the Fund may invest. Investing in other investment companies, including ETFs, may result in duplication of expenses, including advisory fees, in addition to the Fund's own expenses. The risk of owning an investment company or ETF generally reflects the risks of owning the underlying investments the investment company or ETF holds. The Fund may incur brokerage fees in connection with its purchase of ETF shares. Certain ETFs may be thinly traded and experience large spreads between the "ask" price quoted by a seller and the "bid" price offered by a buyer. The existence of extreme market volatility or potential lack of an active trading market for an ETF's shares could result in such shares trading at a significant premium or discount to their NAV.
- **Large-Cap Companies Risk.** The stocks of large capitalization companies as a group could fall out of favor with the market, causing the Fund to underperform investments that focus solely on small- or medium- capitalization stocks.
- **Management Risk.** The Fund is subject to the risk of poor investment selection. In other words, the individual investments of the Fund may not perform as well as expected, and/or the Fund's portfolio management practices may not work to achieve their desired result.

- **Market Risk.** The NAV of the Fund will change with changes in the market value of its portfolio positions. Investors may lose money. The value of investments held by the Fund may increase or decrease in response to economic, political, financial, public health crises (such as epidemics or pandemics) or other disruptive events (whether real, expected or perceived) in the U.S. and global markets. Although the Fund will invest in stocks the Adviser believes will produce less volatility, there is no guarantee that the stocks will perform as expected.
- **New Fund Risk.** The Fund is a newly organized, diversified management investment company with a limited operating history. In addition, there can be no assurance that the Fund will grow to, or maintain, an economically viable size, in which case the Board of Directors of the Company (the “Board”) may determine to liquidate the Fund.
- **Opportunity Risk.** As with all mutual funds, the Fund is subject to the risk of missing out on an opportunity because the assets necessary to take advantage of it are tied up in less advantageous investments.
- **Over-the-Counter Risk.** Securities traded on over-the-counter (“OTC”) markets are not listed and traded on an organized exchange such as the New York Stock Exchange (“NYSE”). Generally, the volume of trading in an unlisted or OTC common stock is less than the volume of trading in an exchange-listed stock. As a result, the market liquidity of some stocks in which the Fund invests may not be as great as that of exchange-listed stocks and, if the Fund were to dispose of such stocks, the Fund may have to offer the shares at a discount from recent prices or sell the shares in small lots over an extended period of time. In addition, penny stocks and pink sheet stocks can be classified as OTC stocks.
- **Semi-Transparent Structure Risk.** The goal of the Proxy Portfolio is, during all market conditions, to track closely the daily performance of the Actual Portfolio and minimize intra-day misalignment between the performance of the Proxy Portfolio and the performance of the Actual Portfolio. The Proxy Portfolio is designed to reflect the economic exposures and the risk characteristics of the Actual Portfolio on any given trading day.
 - The Proxy Portfolio methodology is novel and not yet proven as an effective arbitrage mechanism. The effectiveness of the Proxy Portfolio as an arbitrage mechanism is contingent upon, among other things, the Fund’s factor model analysis creating a Proxy Portfolio that performs in a manner substantially identical to the performance of the Fund’s Actual Portfolio. While the Proxy Portfolio may include some of the Fund’s holdings, it is not the Fund’s Actual Portfolio. ETFs trading on the basis of a published Proxy Portfolio may exhibit wider premiums and discounts, bid/ask spreads, and tracking error than other ETFs using the same investment strategies that publish their portfolios on a daily basis, especially during periods of market disruption or volatility. Therefore, shares of the Fund may cost investors more to trade than shares of a traditional ETF.
 - Each day the Fund calculates the overlap between the holdings of the prior business day’s Proxy Portfolio compared to the Actual Portfolio (*i.e.*, proxy overlap) and the difference, in percentage terms, between the Proxy Portfolio per share NAV and that of the Actual Portfolio (*i.e.*, tracking error). If the tracking error becomes large, there is a risk that the performance of the Proxy Portfolio may deviate from the performance of the Actual Portfolio.
 - The Fund’s Board monitors its tracking error and bid/spread. If deviations become too large, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, corrective measures would be appropriate. See the Statement of Additional Information for further discussion of the Board’s monitoring responsibilities.
 - Although the Fund seeks to benefit from keeping its portfolio information secret, market participants may attempt to use the Proxy Portfolio to identify a Fund’s trading strategy, which if successful, could result in such market participants engaging in certain predatory trading practices that may have the potential to harm the Fund and its shareholders.

Performance

Performance information for the Fund is not included because the Fund did not have a full calendar year of performance as of the most recently completed calendar year. Performance information will be included once the Fund has at least one calendar year of performance. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future and does not guarantee future results. Recent performance information is available on the Fund's website at www.sgi.com.

Management of the Fund

Investment Adviser

Summit Global Investments, LLC serves as the investment adviser.

Investment Sub-Adviser

SG Trading Solutions, LLC serves as the investment sub-adviser.

Portfolio Managers

<i>Name</i>	<i>Title with Adviser</i>	<i>Tenure with the Fund</i>
David Harden	President and Portfolio Manager	Since Inception in March 2023
Aash Shah	Portfolio Manager	Since Inception in March 2023

Purchase and Sale of Fund Shares

Shares are listed on a national securities exchange, the Exchange, and investors can only buy and sell Shares through brokers or dealers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling shares in the secondary market (the "bid-ask spread"). The median bid-ask spread for the Fund's most recent fiscal year cannot be provided because the Fund did not have a trading history to report trading information and related costs prior to the date of this Prospectus. Recent information, including information on the Fund's NAV, market price, premiums and discounts, and bid-ask spreads is provided at www.sgi.com.

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the "Deposit Securities") and/or a designated amount of U.S. cash.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is made through an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Fund's investment adviser, or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.

SGI Dynamic Tactical ETF

SUMMARY SECTION

Investment Objective

The SGI Dynamic Tactical ETF (for this section only, the “Fund”) seeks to provide long-term capital appreciation.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Fund Shares.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment):

Management Fees	0.95%
Distribution (12b-1) Fees	0.00%
Other Expenses ⁽¹⁾	0.00%
Acquired Fund Fees and Expenses	0.09%
Total Annual Fund Operating Expenses	1.04%

⁽¹⁾ “Other Expenses” are estimated for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then hold or redeem all of your Shares at the end of those periods. The Example also assumes that: (1) your investment has a 5% return each year, and (2) the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$106	\$331	\$574	\$1,271

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. For the period from the Fund’s inception on March 30, 2023 to August 31, 2023, the Fund’s portfolio turnover rate was 66% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) and invests in securities of affiliated and unaffiliated ETFs and open-end mutual funds (collectively, “Underlying Funds”). The Fund utilizes both fundamental analysis and proprietary quantitative frameworks that help inform the investment decision-making process regarding strategic investment opportunities.

The Fund may allocate among major equity asset classes and sectors, within the Underlying Funds, of the U.S., foreign and emerging markets equity of any capitalization. It may further allocate, including by not limited to: domestic investment-grade bonds, domestic high yield bonds (also known as “junk bonds”), foreign investment-grade, commodities, precious metals and money market funds during periods of weakness in equity markets.

It will generally have some level of investment in equity assets classes but there is no stated limit on the percentage of assets the fund can invest in a particular Underlying Fund or the percentage of assets the fund will allocate to any one asset class, and at times the fund may focus on a small number of Underlying Funds or asset classes and may be non-diversified across asset classes and/or Underlying Funds.

Under normal circumstances, the Fund will seek to fully participate in the positive upside of equity markets. The Fund will seek to reduce risk when fundamental and quantitative frameworks identify weakness within various asset classes and/or sectors and will tactically alternate various Underlying Funds.

Summit Global Investments, LLC (the “Adviser”) may make tactical exposure changes for various other reason. For example, the Adviser may attempt to lower the Fund’s market risk by investing in the Underlying Funds that seek to lower the overall volatility of the Fund’s portfolio as compared to the S&P 500[®] Index. Volatility is a statistical measurement of the magnitude of up and down fluctuations in the value of a financial instrument or index. In addition, the Adviser reviews the idiosyncratic risks associated with each of the Underlying Funds and if these risks are deemed elevated with increased downside risks the Adviser may make changes to the Underlying Funds.

The Adviser selects the Underlying Funds for the Fund that it anticipates will produce a portfolio with less volatility with more capital protection and consistent returns. While the Adviser attempts to manage the Fund’s various risks, such as volatility and downside risks, there is no guarantee that the strategy will be successful or that the Fund’s portfolio will not experience periods of volatility and loss.

Some of the Underlying Funds may or may not have processes that include environmental, social, and/or governance (“ESG”) considerations as part of their investment strategy. The Adviser may evaluate how corporate management executes the objective of the Underlying Fund through examination of the Underlying Fund’s proxy voting records, prospectus and other reports. The methods that the Underlying Funds use may vary.

The Fund may focus its investments in a particular industry or sector for the purpose of capitalizing due to significant changes in market conditions or geopolitical conditions.

The Fund may sell one or more of the Underlying Funds if the Adviser identifies fundamental, legal or other risks and/or if the risk/return ranking declines due to increasing risk and/or decreasing return potential. The Fund may also decrease weight in an investment for risk control purposes.

The Fund has elected to be, and intends to qualify each year for treatment as a regulated investment company (“RIC”) under Subchapter M of Subtitle A, Chapter 1, of the Internal Revenue Code of 1986, as amended (the “Code”).

Semi-Transparent Actively-Managed ETF with Portfolio Reference Basket Structure. The Fund is an actively-managed, semi-transparent ETF. Unlike traditional ETFs, which generally publish their portfolio holdings on a daily basis, the Fund discloses a portfolio transparency substitute—the “Portfolio Reference Basket”—and certain related information about the Portfolio Reference Basket relative to the Fund’s actual portfolio (“Actual Portfolio”) holdings (the “Portfolio Reference Basket Disclosures”), which are intended to help keep the market price of the Fund’s Shares trading at or close to the underlying net asset value (“NAV”) per Share of the Fund. While the Portfolio Reference Basket includes all of the Fund’s holdings, it is not the Fund’s Actual Portfolio because the holdings will be weighted differently, subject to a minimum weightings overlap of 90% with the Fund’s Actual Portfolio at the beginning of each trading day. The Fund also discloses the maximum deviation between the weightings of the specific securities in the Portfolio Reference Basket and the weightings of those specific securities in the Actual Portfolio, as well as between the weighting of the respective cash positions (the “Guardrail Amount”). The Guardrail Amount is intended to ensure that no individual security in the Portfolio Reference Basket will be overweighted or underweighted by more than the publicly disclosed percentage when compared to the actual weighting of each security within the Actual Portfolio as of the beginning of each trading day. The Fund is actively-managed and does not seek to track an index.

Principal Investment Risks

Loss of money is a risk of investing in the Fund. The value of your investment in the Fund, as well as the amount of return you receive on your investment, may fluctuate significantly from day to day and over time. You may lose part or all of your investment in the Fund or your investment may not perform as well as other similar investments. The Fund's principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. Different risks may be more significant at different times depending on market conditions or other factors.

- **Affiliated Fund Risk.** Affiliated fund risk is the risk that the Adviser may select investments for the Fund based on its own financial interests rather than the Fund's interests. The Adviser may be subject to potential conflicts of interest in selecting the Underlying Funds because the fees paid to the Adviser by some affiliated Underlying Funds may be higher than other Underlying Funds or the Underlying Funds may be in need of assets to enhance their appeal to other investors, liquidity and trading and/or to enable them to carry out their investment strategies. However, the Adviser is a fiduciary to the Fund and is legally obligated to act in the Fund's best interest when selecting Underlying Funds.
- **Currency Risk.** Underlying Funds that invest in foreign securities are subject to currency risk associated with securities that trade or are denominated in currencies other than the U.S. dollar and that may be affected by fluctuations in currency exchange rates. An increase in the strength of the U.S. dollar relative to a foreign currency may cause the U.S. dollar value of an investment in that country to decline. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls.
- **Cyber Security Risk.** Cyber security risk is the risk of an unauthorized breach and access to Fund assets, Fund or customer data (including private shareholder information), or proprietary information, or the risk of an incident occurring that causes the Fund, the Underlying Funds, the Adviser, custodian, transfer agent, distributor and other service providers and financial intermediaries to suffer data breaches, data corruption or lose operational functionality or prevent Fund investors from purchasing, redeeming or exchanging shares or receiving distributions. The Fund and the Adviser have limited ability to prevent or mitigate cyber security incidents affecting third-party service providers, the Underlying Funds, and the Underlying Fund's third-party service providers and such third-party service providers may have limited indemnification obligations to the Fund, the Underlying Funds, or their respective investment advisers. Successful cyber-attacks or other cyber-failures or events affecting the Fund, the Underlying Funds, or third-party service providers may adversely impact and cause financial losses to the Fund or its shareholders. Issuers of securities in which the Fund or Underlying Funds invest are also subject to cyber security risks, and the value of these securities could decline if the issuers experience cyber-attacks or other cyber-failures.
- **Dividend-Paying Securities Risk.** Underlying Funds that invest in dividend-paying securities may be subject to the risk that the company issuing such securities may fail and have to decrease or eliminate its dividend. In such an event, an Underlying Fund, and in turn the Fund, may not only lose the dividend payout but the stock price of the company may fall.
- **Emerging Markets Risk.** The Fund may invest in companies organized in emerging market countries. Investment in emerging market securities involves greater risk than that associated with investment in foreign securities of developed foreign countries. These risks include volatile currency exchange rates, periods of high inflation, increased risk of default, greater social, economic and political uncertainty and instability, less governmental supervision and regulation of securities markets, weaker auditing and financial reporting standards, lack of liquidity in the markets, and the significantly smaller market capitalizations of emerging market issuers. The information available about an emerging market issuer may be less reliable than for comparable issuers in more developed capital markets.

- **Environmental, Social and Governance Investing Risk.** ESG investing risk is the risk stemming from the ESG factors that some Underlying Funds may apply in selecting securities. Some Underlying Funds may screen out particular companies that do not meet their ESG criteria. This may affect the Underlying Funds' and the Fund's exposure to certain companies or industries and cause the Underlying Funds to forego certain investment opportunities. The Underlying Funds' results may be lower than other funds that do not use ESG ratings and/or screen out certain companies or industries. Certain Underlying Funds may screen out companies that they believe may have higher downside risk and lower ESG ratings, but investors may differ in their views of ESG characteristics. As a result, the Underlying Funds may invest in companies that do not reflect the beliefs and values of any particular investor.
- **Equity Risk.** The Underlying Funds' investments in common stock are subject to market, economic and business risks that will cause their price to fluctuate over time. Therefore, an investment in the Fund may be more suitable for long-term investors who can bear the risk of these fluctuations. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **ETF Risk.** The Fund is an ETF, and, as a result of an ETF's structure, it is exposed to the following risks: "Authorized Participants, Market Makers and Liquidity Providers Concentration Risk," "Cash Transactions Risk," "Limitations of Intraday Indicative Value (IIV) Risk," "Secondary Market Trading Risk," and "Shares May Trade at Prices Other Than NAV Risk."
 - o *Authorized Participants, Market Makers and Liquidity Providers Concentration Risk.* Only an authorized participant may engage in creation or redemption transactions directly with the Fund. The Fund has a limited number of financial institutions that are institutional investors and may act as authorized participants ("APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. These events, among others, may lead to the Fund Shares trading at a premium or discount to NAV. Thus, you may pay more (or less) than the NAV when you buy Shares of the Fund in the secondary market, and you may receive less (or more) than NAV when you sell those Shares in the secondary market. A diminished market for an ETF's shares substantially increases the risk that a shareholder may pay considerably more or receive significantly less than the underlying value of the ETF shares bought or sold. In periods of market volatility, APs, market makers and/or liquidity providers may be less willing to transact in Fund Shares. Further, the Fund is utilizing a novel and unique structure, which may affect the number of entities willing to act as APs, market makers and/or liquidity providers.
 - o *Cash Transactions Risk.* Unlike traditional ETFs, the securities in the Fund's basket of securities exchanged for a Creation Unit will not correspond pro rata to the positions in the Fund's portfolio, and the Fund may effect its creations and redemptions partially or wholly for cash rather than on an in-kind basis. Because of this, the Fund may incur costs such as brokerage costs or be unable to realize certain tax benefits associated with in-kind transfers of portfolio securities that may be realized by other ETFs. These costs may decrease the Fund's NAV to the extent that the costs are not offset by a transaction fee payable by an AP. Shareholders may be subject to tax on gains they would not otherwise have been subject to and/or at an earlier date than if the Fund had effected redemptions wholly on an in-kind basis.
 - o *Limitations of Intraday Indicative Value (IIV) Risk.* The Exchange or a market data vendor intends to disseminate the approximate per share value of the Fund's Portfolio Reference Basket every 15 seconds (the "intraday indicative value" or "IIV"). The IIV should not be viewed as a "real-time" update of the NAV per share of the Fund because (i) the IIV is not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day, (ii) the calculation of NAV may be subject to fair valuation at different prices than those used in the calculations of the IIV, (iii) unlike the calculation of NAV, the IIV does not take into account Fund expenses, and (iv) the IIV is based on the Portfolio Reference

Basket and not on the Fund's Actual Portfolio. The Fund, the Adviser, Sub-Adviser and their affiliates are not involved in, or responsible for, any aspect of the calculation or dissemination of the Fund's IIV, and the Fund, the Adviser, Sub-Adviser and their affiliates do not make any warranty as to the accuracy of these calculations.

- o *Secondary Market Trading Risk.* Although Shares are listed on a national securities exchange, the Nasdaq Stock Market LLC (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that an active or liquid trading market for them will develop or be maintained. In addition, trading in Shares on the Exchange may be halted. Trading may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Fund inadvisable. These may include: (a) the extent to which trading is not occurring in the securities and/or the financial instruments composing the Portfolio Reference Basket and/or Actual Portfolio; or (b) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. During periods of market stress, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.
- o *Shares May Trade at Prices Other Than NAV Risk.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although the Portfolio Reference Basket structure is intended to provide market participants with enough information to allow for an effective arbitrage mechanism that will help to keep the market price of the Fund's Shares at or close to the Fund's NAV, there is a risk that market prices for Fund Shares will vary significantly from the Fund's NAV. This risk is heightened in times of market volatility or periods of steep market declines. This risk may be greater for the Fund than for traditional ETFs that disclose their full portfolio holdings on a daily basis because the publication of the Portfolio Reference Basket does not provide the same level of transparency as the daily publication of the actual portfolio by a traditional ETF. This could cause the Fund's Shares to have wider bid/ask spreads and larger premiums/discounts than traditional ETFs using the same or similar investment strategies.
- **Fixed Income Securities Risk.** To the extent the Fund invests in Underlying Funds that invest in fixed income securities, the Fund will be subject to fixed income securities risks. While fixed income securities normally fluctuate less in price than stocks, there have been extended periods of increases in interest rates that have caused significant declines in fixed income securities prices. The values of fixed income securities may be affected by changes in the credit rating or financial condition of their issuers. Generally, the lower the credit rating of a security, the higher the degree of risk as to the payment of interest and return of principal.

Credit Risk. The issuer of a fixed income security may not be able to make interest and principal payments when due. Generally, the lower the credit rating of a security, the greater the risk that the issuer will default on its obligation. An Underlying Fund could also be delayed or hindered in its enforcement of rights against an issuer, guarantor, or counterparty.

Duration Risk. Prices of fixed income securities with longer effective maturities are more sensitive to interest rate changes than those with shorter effective maturities.

Income Risk. The Fund's income could decline due to falling market interest rates. In a falling interest rate environment, the Fund may be required to invest in Underlying Funds that invest their assets in lower-yielding securities. Because interest rates vary, it is impossible to predict the income or yield of the Fund for any particular period.

Interest Rate Risk. The value of the Fund or an Underlying Fund may fluctuate based upon changes in interest rates and market conditions. As interest rates increase, the value of an Underlying Fund's income-producing investments may go down. For example, bonds tend to decrease in value when interest rates rise. Debt obligations with longer maturities typically offer higher yields, but are subject to greater price movements as a result of interest rate changes than debt obligations with shorter maturities. Changing interest rates may have unpredictable effects on the markets and an Underlying Fund's investments and may also affect the liquidity of fixed income securities and instruments held by an Underlying Fund.

Prepayment Risk. The Fund may invest in Underlying Funds that invest in securities that are subject to fluctuations in yield, due to prepayment rates that may be faster or slower than expected.

Rating Risk. If a rating agency gives a debt security a lower rating, the value of the debt security will decline because investors will demand a higher rate of return.

- **Foreign Custody Risk.** An Underlying Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Underlying Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Underlying Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well-regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.
- **Foreign Securities Risk.** Underlying Funds that invest in foreign securities may be subject to special risks, including, but not limited to, currency exchange rate volatility, political, social or economic instability, less publicly available information, less stringent investor protections and differences in taxation, auditing and other financial practices. Investments in emerging market securities by Underlying Funds are subject to higher risks than those in developed countries because there is greater uncertainty in less established markets and economies.
- **Growth Risk.** If an Underlying Fund adviser's perceptions of a company's growth potential are wrong, the securities purchased by that Underlying Fund may not perform as expected, thereby reducing the Underlying Fund's and the Fund's return.
- **High Portfolio Turnover Risk.** Portfolio turnover risk is the risk that when investing on a shorter-term basis, the Fund may as a result trade more frequently and incur higher levels of brokerage fees and commissions and cause higher levels of current tax liability to shareholders of the Fund. A portfolio turnover rate of 100% is considered to be high. The Adviser may engage in active trading, and will not consider portfolio turnover a limiting factor in making decisions for the Fund.
- **High-Yield Securities ("Junk Bond") Risk.** To the extent that a Fund invests in Underlying Funds that invest in high-yield securities and unrated securities of similar credit quality (commonly known as "junk bonds"), the Fund may be subject to greater levels of interest rate and credit risk than funds that do not invest in such securities. Junk bonds are considered predominately speculative with respect to the issuer's continuing ability to make principal and interest payments. An economic downturn or period of rising interest rates could adversely affect the market for these securities and reduce an Underlying Fund's ability to sell these securities (liquidity risk). If the issuer of a security is in default with respect to interest or principal payments, the Underlying Fund may lose its entire investment, which will affect the Underlying Fund's and the Fund's return.
- **Index Management Risk.** To the extent the Fund invests in an Underlying Fund that is intended to track a target index, it is subject to the risk that the Underlying Fund may track its target index less closely. For example, an adviser to the Underlying Fund may select securities that are not fully representative of the index, and the Underlying Fund's transaction expenses, and the size and timing of its cash flows, may result in the Underlying Fund's performance being different than that of its index. Additionally, the Underlying Fund will generally reflect the performance of its target index even when the index does not perform well.
- **Industry or Sector Focus Risk.** To the extent the Fund invests in Underlying Funds that focus their investments in a particular industry or sector, the Fund's shares may be more volatile and fluctuate more than shares of a fund investing in a broader range of securities.
- **Large-Capitalization Companies Risk.** The stocks of large capitalization companies as a group could fall out of favor with the market, causing an Underlying Fund and the Fund to underperform investments that focus solely on small- or medium- capitalization stocks.

- **Low Volatility Risk.** Underlying Funds with investments in low volatility companies are seen as having a lower risk profile than the overall markets. However, a portfolio comprised of low volatility Underlying Funds may not produce investment exposure that has lower variability to changes in market levels. Investing in low volatility Underlying Funds may limit the Fund's gains in rising markets.
- **Management Risk.** The Fund is subject to the risk of poor selection in Underlying Funds. The Underlying Funds may not perform as well as expected, and/or the Fund's portfolio management practices may not work to achieve their desired result.
- **Market Risk.** The NAV of the Fund will change with changes in the market value of its portfolio positions. Investors may lose money. The value of investments held by the Fund may increase or decrease in response to economic, political, financial, public health crises (such as epidemics or pandemics) or other disruptive events (whether real, expected or perceived) in the U.S. and global markets. Although the Fund will invest in Underlying Funds that the Adviser believes will produce less volatility, there is no guarantee that the Underlying Funds will perform as expected. The prices of securities held by the Underlying Funds may decline in response to conditions affecting the general economy, overall market changes, local, regional or global political, social or economic instability, and currency, interest rate and commodity price fluctuations.
- **Mid-Capitalization Companies Risk.** The stocks of mid-capitalization companies that the Underlying Funds may invest in may be subject to more abrupt or erratic market movements than stocks of larger, more established companies.
- **New Fund Risk.** The Fund is a newly organized, diversified management investment company with limited operating history. In addition, there can be no assurance that the Fund will grow to, or maintain, an economically viable size, in which case the Board of the Company may determine to liquidate the Fund.
- **Opportunity Risk.** As with all mutual funds, the Fund is subject to the risk of missing out on an opportunity because the assets necessary to take advantage of it are tied up in less advantageous investments.
- **Small-Capitalization Companies Risk.** Small-cap companies that the Underlying Funds may invest in may be more volatile than, and not as readily marketable as, those of larger companies. Small companies may also have limited product lines, markets or financial resources and may be dependent on relatively small or inexperienced management groups. Additionally, the trading volume of small-cap company securities may make them more difficult to sell than those of larger companies. Moreover, the lack of an efficient market for the securities may make them difficult to value.
- **Underlying Funds Risk.** Investing in Underlying Funds may result in duplication of expenses, including advisory fees, in addition to the Fund's own expenses. The Fund's investment performance and its ability to achieve its investment objective are directly related to the performance of the Underlying Funds in which it invests. The risk of owning an Underlying Fund generally reflects the risks of owning the underlying investments the Underlying Fund holds. The Fund may incur brokerage fees in connection with its purchase of ETF shares. In October 2020, the SEC adopted certain regulatory changes and took other actions related to the ability of an investment company to invest in another investment company. These regulatory changes may adversely impact the Fund's investment strategies and operations.

Performance

Performance information for the Fund is not included because the Fund did not have a full calendar year of performance as of the most recently completed calendar year. Performance information will be included once the Fund has at least one calendar year of performance. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future and does not guarantee future results. Recent performance information is available on the Fund's website at www.sgiam.com

Management of the Fund

Investment Adviser

Summit Global Investments, LLC serves as the investment adviser.

Investment Sub-Adviser

SG Trading Solutions, LLC serves as the investment sub-adviser.

Portfolio Managers

<i>Name</i>	<i>Title with Adviser</i>	<i>Tenure with the Fund</i>
David Harden	President and Portfolio Manager	Since Inception in March 2023
Aash Shah	Portfolio Manager	Since Inception in March 2023

Purchase and Sale of Fund Shares

Shares are listed on a national securities exchange, the Exchange, and investors can only buy and sell Shares through brokers or dealers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares (bid) and the lowest price a seller is willing to accept for shares (ask) when buying or selling shares in the secondary market (the “bid-ask spread”). The median bid-ask spread for the Fund’s most recent fiscal year cannot be provided because the Fund did not have a trading history to report trading information and related costs prior to the date of this Prospectus. Recent information, including information on the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads is provided at www.sgi.com.

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is made through an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

Financial Intermediary Compensation

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Fund’s investment adviser, or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

ADDITIONAL INFORMATION ABOUT THE FUNDS

Investment Objective

Each Fund's investment objective may be changed by the Board of Directors (the "Board") of the Company without shareholder approval. Shareholders will, however, receive 60 days' prior written notice of any changes. Any such changes may result in a Fund having an investment objective different from the objective that the shareholder considered appropriate at the time of investment in the Fund.

Additional Principal Strategy Information

SGI U.S. Large Cap Core ETF. Unlike traditional ETFs, this Fund does not disclose its portfolio holdings (Actual Portfolio) daily. The Fund instead posts a "Proxy Portfolio" on its website each day, including the following information for each portfolio holding in the Proxy Portfolio: (1) ticker symbol; (2) CUSIP or other identifier; (3) description of holding; (4) quantity of each security or other asset held; and (5) percentage weight of the holding in the Proxy Portfolio. The Fund's Board monitors its Tracking Error and bid/spread. If deviations become too large, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, corrective measures would be appropriate. See the Statement of Additional Information ("SAI") for further discussion of the Board's monitoring responsibilities.

The Proxy Portfolio is designed to recreate the daily performance of the Actual Portfolio. This is achieved by performing a "Factor Model" analysis of the Actual Portfolio. The Factor Model is comprised of three sets of factors or analytical metrics: market-based factors, fundamental factors, and industry/sector factors. The Fund uses a "Model Universe" to generate its Proxy Portfolio. The Model Universe is comprised of securities that the Fund can purchase and will be a financial index or stated portfolio of securities from which Fund investments will be selected. The results of the Factor Model analysis are then applied to the Model Universe. The daily rebalanced Proxy Portfolio is then generated as a result of this Model Universe analysis with the Proxy Portfolio being a small subset of the Model Universe. The Factor Model is applied to both the Actual Portfolio and the Model Universe to construct the Fund's Proxy Portfolio that performs in a manner substantially identical to the performance of its Actual Portfolio. The Proxy Portfolio will only include investments the Fund is permitted to hold. The Fund's SAI contains more information on the Proxy Portfolio and its construction.

SGI Dynamic Tactical ETF. Unlike traditional ETFs that provide daily disclosure of their portfolio holdings, this Fund discloses the identities of all portfolio holdings daily, but not the exact quantities or weightings. Instead, the Fund discloses a Portfolio Reference Basket generated each day by a proprietary algorithmic process that is designed to closely track the daily performance of the Fund's Actual Portfolio on any given trading day. A description of the policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the SAI.

Given that this structure is unlike fully-transparent active ETFs, the Adviser will monitor on an on-going basis how Shares trade, with specific consideration to the level of any market price premium or discount to NAV and the bid/ask spreads on market transactions. For at least the first three years after launch of the Fund, the Adviser will promptly call a meeting of the Board (and will present to the Board for its consideration, recommendations for appropriate remedial measures), and the Board will promptly meet, if the tracking error (relative to the Actual Portfolio) exceeds 1%, or if, for 30 or more days in any quarter or 15 days in a row, the absolute difference between either the closing price or the Bid/Ask Price, on one hand, and NAV, on the other, exceeds 2.00% or the bid/ask spread exceeds 2.00%. In such a circumstance, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, action would be appropriate to among other things, narrow the premium/discount or spread, or tracking error, as applicable. The Board will then decide whether to take any such action. Potential actions may include, but are not limited to, changing lead market makers, listing the Fund on a different exchange, changing the size of Creation Units, changing the Fund's investment objective or strategy, and liquidating the Fund.

Additional Information About Each Fund's Principal Investments and Risks

Affiliated Fund Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* The Adviser may have a conflict of interest with respect to Fund investments in Underlying Funds, particularly when an Underlying Fund has low assets. The Adviser also has an economic conflict of interest in determining the allocation of the Fund's assets among the Underlying Funds, as it earns different fees from the various Underlying Funds.

Convertible Securities. Convertible securities have characteristics of both equity and fixed income securities. The value of a convertible security tends to move with the market value of the underlying stock, but may also be affected by interest rates, the credit quality of the issuer and any call provisions. In particular, when interest rates rise, fixed income securities will decline in value.

Currency Risk. An Underlying Fund's investment in foreign securities involves currency risk associated with securities that trade or are denominated in currencies other than the U.S. dollar and that may be affected by fluctuations in currency exchange rates. An increase in the strength of the U.S. dollar relative to a foreign currency may cause the U.S. dollar value of an investment in that country to decline. Foreign currencies also are subject to risks caused by inflation, interest rates, budget deficits and low savings rates, political factors and government controls.

Cyber Security Risk. With the increased use of technologies such as the internet to conduct business, the Funds and the Underlying Funds are susceptible to operational, information security and related risks. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber-attacks include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. Cyber-attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber security failures or breaches by the Funds' or an Underlying Fund's adviser and other service providers (including, but not limited to, the Funds' or an Underlying Fund's accountant, custodian, transfer agent and administrator), and the issuers of securities in which the Underlying Funds invest, have the ability to cause disruptions and impact business operations, potentially resulting in financial losses, interference with the Funds' or an Underlying Fund's ability to calculate its NAV, impediments to trading, the inability of Fund shareholders to transact business, violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs. In addition, substantial costs may be incurred in order to prevent any cyber incidents in the future. While the Adviser has established business continuity plans in the event of, and risk management systems to prevent, such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Funds cannot control the cyber security plans and systems put in place by service providers to the Funds and the Underlying Funds, and issuers in which the Underlying Funds invest. A Fund and its shareholders could be negatively impacted as a result.

Dividend-Paying Securities Risk. A Fund or an Underlying Fund that invests in a company issuing dividend-paying securities may fail and have to decrease or eliminate the company's dividend. In such an event, a Fund or an Underlying Fund, may not only lose the dividend payout but the stock price of the company may fall.

Emerging Markets Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* The Fund may invest in companies organized in emerging market countries. Investment in emerging market securities involves greater risk than that associated with investment in foreign securities of developed foreign countries. These risks include volatile currency exchange rates, periods of high inflation, increased risk of default, greater social, economic and political uncertainty and instability, less governmental supervision and regulation of securities markets, weaker auditing and financial reporting standards, lack of liquidity in the markets, and the significantly smaller market capitalizations of emerging market issuers. The information available about an emerging market issuer may be less reliable than for comparable issuers in more developed capital markets. Further, investments in securities of issuers located in certain emerging countries involve the risk of loss resulting from problems in share registration, settlement or custody, substantial economic, political and social disruptions and the imposition of exchange controls (including repatriation restrictions). The legal remedies for investors in emerging markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (*e.g.*, SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited.

Equity Risk. A Fund or an Underlying Fund that invests in common stocks are subject to market, economic and business risks that will cause their price to fluctuate over time. Historically, the equity markets have moved in cycles, and the value of a Fund's or an Underlying Fund's equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility. An investment in the Funds may be more suitable for long-term investors who can bear the risk of these fluctuations. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.

Environmental, Social and Governance Investing Risk. ESG investing risk is the risk stemming from the ESG factors that the Funds and some Underlying Funds may apply in selecting securities. Some Underlying Funds may screen out particular companies that do not meet their ESG criteria. This may affect the Underlying Funds' and a Fund's exposure to certain companies or industries and cause the Underlying Funds to forego certain investment opportunities. The Underlying Funds' results may be lower than other funds that do not use ESG ratings and/or screen out certain companies or industries. The Funds and certain Underlying Funds may screen out companies that they believe may have higher downside risk and lower ESG ratings, but investors may differ in their views of ESG characteristics. As a result, the Funds and certain Underlying Funds may invest in companies that do not reflect the beliefs and values of any particular investor.

ETF Risk. Each Fund is an ETF, and, as a result of an ETF's structure, each Fund is exposed to the following risks:

Authorized Participants, Market Makers and Liquidity Providers Concentration Risk. Each Fund may have a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. These events, among others, may lead to the Fund Shares trading at a premium or discount to NAV. Thus, you may pay more (or less) than the NAV when you buy Shares of the Fund in the secondary market, and you may receive less (or more) than NAV when you sell those Shares in the secondary market. A diminished market for an ETF's shares substantially increases the risk that a shareholder may pay considerably more or receive significantly less than the underlying value of the ETF shares bought or sold.

Predatory Trading Practices Risk. Although each Fund seeks to benefit from keeping its portfolio holdings information secret, market participants may attempt to use the Portfolio Reference Basket or Proxy Portfolio and related Portfolio Reference Basket Disclosures or Proxy Portfolio Disclosures to identify a Fund's holdings and trading strategy. If successful, this could result in such market participants engaging in predatory trading practices that could harm a Fund and its shareholders. The Portfolio Reference Basket and Proxy Portfolio and related Portfolio Reference Basket Disclosures and Proxy Portfolio Disclosures have been designed to minimize the risk that market participants could "reverse engineer" a Fund's portfolio and investment strategy, but they may not be successful in this regard.

Secondary Market Trading Risk. Although the U.S. Large Cap Core ETF's Shares are listed on the NYSE Arca, Inc. and the SGI Dynamic Tactical ETF's Shares are listed for trading on the Nasdaq National Stock Market LLC (together, the "Exchange") and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for Shares will develop or be maintained. Trading may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. These may include: (a) the extent to which trading is not occurring in the securities and/or the financial instruments composing the Portfolio Reference Basket, Proxy Portfolio and/or Actual Portfolio; or (b) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. If the Exchange becomes aware that the NAV, Portfolio Reference Basket/Proxy Portfolio, or Actual Portfolio is not disseminated to all market participants at the same time, the Exchange shall halt trading in such series until such time as the NAV, Portfolio Reference Basket/Proxy Portfolio, or Actual Portfolio is available to all market participants at the same time. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange. Additional rules applicable to the Exchange may halt trading in Shares when extraordinary volatility causes sudden, significant swings in the market price of Shares. If a trading halt or unanticipated early closing of the Exchange occurs, a shareholder may be unable to purchase or sell Shares of a Fund. Trading halts may have more effect on a Fund because of its semi-transparent structure. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of a Fund's Shares may begin to mirror the liquidity of the Fund's underlying holdings, which can be significantly less liquid than the Fund's Shares.

Shares May Trade at Prices Other Than NAV Risk. As with all ETFs, Shares of each Fund may be bought and sold in the secondary market at market prices. Although the semi-transparent structure of each Fund is intended to provide market participants with enough information to allow for an effective arbitrage mechanism that will help to keep the

market price of the Fund's Shares at or close to the Fund's NAV, there is a risk that market prices for Fund Shares will vary significantly from the Fund's NAV. This risk is heightened in times of market disruption or volatility or periods of steep market declines. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a "bid/ask" spread charged by the exchange specialist, market makers or other participants that trade Shares. In times of severe market disruption, the bid/ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. This risk may be greater for the Funds than for traditional ETFs that disclose their full portfolio holdings on a daily basis because the publication of the Portfolio Reference Basket/Proxy Portfolio does not provide the same level of transparency as the daily publication of the actual portfolio by a traditional ETF. This could cause a Fund's Shares to have wider bid/ask spreads and larger premiums/discounts than traditional ETFs using the same or similar investment strategies. Therefore, a Fund's Shares may cost investors more to trade than traditional ETF shares, especially during periods of market disruption or volatility.

Fixed Income Securities Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* To the extent the SGI Dynamic Tactical ETF invests in Underlying Funds that invest in fixed income securities, the Fund will be subject to fixed income securities risk. While fixed income securities normally fluctuate less in price than stocks, there have been extended periods of increases in interest rates that have caused significant declines in fixed income securities prices. The values of fixed income securities may be affected by changes in the credit rating or financial condition of their issuers. Generally, the lower the credit rating of a security, the higher the degree of risk as to the payment of interest and return of principal.

Credit Risk. The issuer of a fixed income security may not be able to make interest and principal payments when due. Generally, the lower the credit rating of a security, the greater the risk that the issuer will default on its obligation. An Underlying Fund could also be delayed or hindered in its enforcement of rights against an issuer, guarantor, or counterparty.

Duration Risk. Prices of fixed income securities with longer effective maturities are more sensitive to interest rate changes than those with shorter effective maturities.

Income Risk. The SGI Dynamic Tactical ETFs income could decline due to falling market interest rates. In a falling interest rate environment, the SGI Dynamic Tactical ETF may be required to invest in Underlying Funds that invest their assets in lower-yielding securities. Because interest rates vary, it is impossible to predict the income or yield of the SGI Dynamic Tactical ETF for any particular period.

Interest Rate Risk. The value of the SGI Dynamic Tactical ETF or an Underlying Fund may fluctuate based upon changes in interest rates and market conditions. As interest rates increase, the value of an Underlying Fund's income-producing investments may go down. For example, bonds tend to decrease in value when interest rates rise. Debt obligations with longer maturities typically offer higher yields, but are subject to greater price movements as a result of interest rate changes than debt obligations with shorter maturities. Changing interest rates may have unpredictable effects on the markets and an Underlying Fund's investments and may also affect the liquidity of fixed income securities and instruments held by an Underlying Fund.

Prepayment Risk. The SGI Dynamic Tactical ETF may invest in Underlying Funds that invest in securities that are subject to fluctuations in yield, due to prepayment rates that may be faster or slower than expected.

Rating Risk. If a rating agency gives a debt security a lower rating, the value of the debt security will decline because investors will demand a higher rate of return.

Foreign Custody Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* The Underlying Funds may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Underlying Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Underlying Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well-regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Foreign Securities Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* Foreign securities are subject to special risks, including risks associated with more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; less economic, political and social stability; and differences in taxation, auditing and other financial practices. The Underlying Funds may invest in securities of foreign issuers that are traded or denominated in U.S. dollars primarily through depositary receipts. Depositary receipts may be available through “sponsored” or “unsponsored” facilities. Holders of unsponsored depositary receipts generally bear all of the costs of the unsponsored facility. The depository of an unsponsored facility is frequently under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through, to the holders of the receipts, voting rights with respect to the deposited securities. The depository of unsponsored depositary receipts may provide less information to receipt holders. Investments in emerging markets securities by the Underlying Funds are subject to higher risks than those in developed countries because there is greater uncertainty in less established markets and economies. In addition, foreign securities in which the Underlying Funds invest may be traded in markets that close before the time that the Underlying Funds calculate their NAV. Furthermore, certain foreign securities in which the Underlying Funds invest may be listed on foreign exchanges that trade on weekends or other days when the Underlying Funds do not calculate their NAV. As a result, the value of the Funds or Underlying Funds’, and thus the SGI Dynamic Tactical ETF’s, holdings may change on days when shareholders are not able to purchase or redeem the SGI Dynamic Tactical ETF’s shares.

Growth Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* If an Underlying Fund adviser’s perceptions of a company’s growth potential are wrong, the securities purchased by that Underlying Fund may not perform as expected, thereby reducing the Underlying Fund’s and the SGI Dynamic Tactical ETF’s return.

High-Yield Securities (“Junk Bond”) Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* Underlying Funds that invest in high-yield securities and unrated securities of similar credit quality (commonly known as “junk bonds”) may be subject to greater levels of interest rate and credit risk than funds that do not invest in such securities. Junk bonds are considered predominately speculative with respect to the issuer’s continuing ability to make principal and interest payments. An economic downturn or period of rising interest rates could adversely affect the market for these securities and reduce an Underlying Fund’s ability to sell these securities (liquidity risk). If the issuer of a security is in default with respect to interest or principal payments, the Underlying Fund may lose its entire investment, which will affect the Underlying Fund’s and the SGI Dynamic Tactical ETF’s return.

Index Management Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* To the extent the SGI Dynamic Tactical ETF invests in an Underlying Fund that is intended to track a target index, it is subject to the risk that the Underlying Fund may track its target index less closely. For example, an adviser to the Underlying Fund may select securities that are not fully representative of the index, and the Underlying Fund’s transaction expenses, and the size and timing of its cash flows, may result in the Underlying Fund’s performance being different than that of its index. Additionally, the Underlying Fund will generally reflect the performance of its target index even when the index does not perform well.

Industry or Sector Focus Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* Companies and Underlying Funds in which the SGI Dynamic Tactical ETF invests may focus their investments in a particular industry or sector, and accordingly the SGI Dynamic Tactical ETF’s shares may be more volatile and fluctuate more than shares of a fund investing in a broader range of securities. An Underlying Fund may invest in a specific industry or sector in order to capitalize on performance momentum or reduce downside exposure due to significant changes in market conditions, economic conditions, or geopolitical conditions.

Large-Capitalization Companies Risk. Large capitalization companies as a group could fall out of favor with the market, causing a Fund to underperform investments that focus solely on small- or medium- capitalization stocks.

Low Volatility Risk. Investments in low volatility companies are seen as having a lower risk profile than the overall markets. However, a portfolio comprised of low volatility companies and/or Underlying Funds may not produce investment exposure that has lower variability to changes in market levels. Investing in low volatility companies and/or Underlying Funds may limit a Fund’s gains in rising markets.

Management Risk. Each Fund is subject to the risk of poor selection of portfolio securities. The companies or Underlying Funds in which a Fund invests may not perform as well as expected, and/or a Fund's portfolio management practices may not work to achieve their desired result. If the Adviser's perception of a Fund's portfolio securities' value is not realized in the expected time frame, a Fund's overall performance may suffer.

Market Risk. The NAV of a Fund will change with changes in the market value of its portfolio positions. Investors may lose money. Although the Funds will invest in companies or Underlying Funds that the Adviser believes will produce less volatility, there is no guarantee that the companies or Underlying Funds will perform as expected. The prices of securities held by the Funds may decline in response to conditions affecting the general economy, overall market changes, local, regional or global political, social or economic instability, and currency, interest rate and commodity price fluctuations.

Periods of unusually high financial market volatility and restrictive credit conditions, at times limited to a particular sector or geographic area, have occurred in the past and may be expected to recur in the future. Some countries, including the United States, have adopted or have signaled protectionist trade measures, relaxation of the financial industry regulations that followed the financial crisis, and/or reductions to corporate taxes. The scope of these policy changes is still developing, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, particularly if a resulting policy runs counter to the market's expectations. The outcome of such changes cannot be foreseen at the present time. In addition, geopolitical and other risks, including environmental and public health risks, may add to instability in the world economy and markets generally. As a result of increasingly interconnected global economies and financial markets, the value and liquidity of a Fund's investments may be negatively affected by events impacting a country or region, regardless of whether the Fund invests in issuers located in or with significant exposure to such country or region.

The outbreak of COVID-19 and efforts to contain its spread have resulted in international and domestic travel restrictions and disruptions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, quarantines, event and service cancellations or interruptions, disruptions to business operations (including staff reductions), supply chains and consumer activity, as well as general concern and uncertainty that has negatively affected the economic environment. These disruptions have led to instability in the marketplace, including stock and credit market losses and overall volatility. The impact of COVID-19, and other infectious illness outbreaks, epidemics or pandemics that may arise in the future, could adversely affect the economies of many nations or the entire global economy, the financial performance of individual issuers, borrowers and sectors and the health of the markets generally in potentially significant and unforeseen ways. Health crises caused by the recent outbreak may heighten other pre-existing political, social and economic risks in a country or region. In the event of a pandemic or an outbreak, there can be no assurance that the Funds and their service providers will be able to maintain normal business operations for an extended period of time or will not lose the services of key personnel on a temporary or long-term basis due to illness or other reasons. Although vaccines for COVID-19 are becoming more widely available, the full impacts of a pandemic or disease outbreaks are unknown and the pace of recovery may vary from market to market, resulting in a high degree of uncertainty for potentially extended periods of time.

Recently, various countries have seen significant internal conflicts and in some cases, civil wars may have had an adverse impact on the securities markets of the countries concerned. In addition, the occurrence of new disturbances due to acts of war or terrorism or other political developments cannot be excluded. Nationalization, expropriation or confiscatory taxation, currency blockage, political changes, government regulation, political, regulatory or social instability or uncertainty or diplomatic developments, including the imposition of sanctions or other similar measures, could adversely affect the Funds' investments.

Recent examples of the above include conflict, loss of life and disaster connected to ongoing armed conflict between Russia and Ukraine in Europe and Hamas and Israel in the Middle East. The extent, duration and impact of these conflicts, related sanctions and retaliatory actions are difficult to ascertain, but could be significant and have severe adverse effects on the region, including significant adverse effects on the regional or global economies and the markets for certain securities and commodities. These impacts could negatively affect the Funds' investments in securities and instruments that are economically tied to the applicable region, and include (but are not limited to) declines in value and reductions in liquidity. In addition, to the extent new sanctions are imposed or previously relaxed sanctions are reimposed (including with respect to countries undergoing transformation), complying with such restrictions may prevent the Funds from pursuing certain investments, cause delays or other impediments with respect to consummating such investments or divestments,

require divestment or freezing of investments on unfavorable terms, render divestment of underperforming investments impracticable, negatively impact the Funds' ability to achieve their investment objectives, prevent the Funds from receiving payments otherwise due, increase diligence and other similar costs to the Funds, render valuation of affected investments challenging, or require the Funds to consummate an investment on terms that are less advantageous than would be the case absent such restrictions. Any of these outcomes could adversely affect the Funds' performance with respect to such investments, and thus the Funds' performance as a whole.

New Fund Risk. There can be no assurance that a newly organized Fund with a limited operating history will grow to, or maintain, an economically viable size, in which case the Board may determine to liquidate the Fund. Liquidation can be initiated without shareholder approval by the Board if it determines it is in the best interest of shareholders. As a result, the timing of any liquidation may not be favorable to certain individual shareholders.

OTC Risk. *(Only a principal risk of the SGI U.S. Large Cap Core ETF)* Securities traded on OTC markets are not listed and traded on an organized exchange such as the NYSE. Generally, the volume of trading in an unlisted or OTC common stock is less than the volume of trading in an exchange-listed stock. As a result, the market liquidity of some stocks in which the Fund invests may not be as great as that of exchange-listed stocks and, if the Fund were to dispose of such stocks, the Fund may have to offer the shares at a discount from recent prices or sell the shares in small lots over an extended period of time. In addition, penny stocks and pink sheet stocks can be classified as OTC stocks. The Fund may hold these stocks, which have considerable risks. First, it may be difficult to obtain financial data on such stocks. This makes fundamental analysis very difficult. Second, these classes of stocks are notoriously difficult to sell, meaning there will be some liquidity risk associated with holding them. OTC investments are generally limited to equities with sufficient liquidity.

Semi-Transparent Structure Risk.

SGI U.S. Large Cap Core ETF. The goal of the Proxy Portfolio is, during all market conditions, to track closely the daily performance of the Actual Portfolio and minimize intra-day misalignment between the performance of the Proxy Portfolio and the performance of the Actual Portfolio. The Proxy Portfolio is designed to reflect the economic exposures and the risk characteristics of the Actual Portfolio on any given trading day.

- The Proxy Portfolio methodology is novel and not yet proven as an effective arbitrage mechanism. The effectiveness of the Proxy Portfolio as an arbitrage mechanism is contingent upon, among other things, the Fund's factor model analysis creating a Proxy Portfolio that performs in a manner substantially identical to the performance of the Fund's Actual Portfolio. While the Proxy Portfolio may include some of the Fund's holdings, it is not the Fund's Actual Portfolio. ETFs trading on the basis of a published Proxy Portfolio may exhibit wider premiums and discounts, bid/ask spreads, and tracking error than other ETFs using the same investment strategies that publish their portfolios on a daily basis, especially during periods of market disruption or volatility. Therefore, shares of the Fund may cost investors more to trade than shares of a traditional ETF.
- Each day the Fund calculates the overlap between the holdings of the prior business day's Proxy Portfolio compared to the Actual Portfolio (*i.e.*, proxy overlap) and the difference, in percentage terms, between the Proxy Portfolio per share NAV and that of the Actual Portfolio (*i.e.*, tracking error). If the tracking error becomes large, there is a risk that the performance of the Proxy Portfolio may deviate from the performance of the Actual Portfolio.
- The Fund's Board monitors its tracking error and bid/spread. If deviations become too large, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, corrective measures would be appropriate. See the Statement of Additional Information for further discussion of the Board's monitoring responsibilities.
- Although the Fund seeks to benefit from keeping its portfolio information secret, market participants may attempt to use the Proxy Portfolio to identify a Fund's trading strategy, which if successful, could result in such market participants engaging in certain predatory trading practices that may have the potential to harm the Fund and its shareholders.

SGI Dynamic Tactical ETF. Unlike traditional ETFs that provide daily disclosure of their portfolio holdings, the Fund discloses daily the identities of all portfolio holdings, but not the exact quantities or weightings. Instead, the Fund discloses a Portfolio Reference Basket generated each day by a proprietary algorithmic process that is designed to closely track the

daily performance of the Fund's Actual Portfolio on any given trading day. Although the Portfolio Reference Basket and Portfolio Reference Basket Disclosures are intended to provide authorized participants and other market participants with enough information to allow them to engage in effective arbitrage transactions that will help keep the market price of the Shares trading at or close to the underlying NAV per Share of the Fund, there is a risk that market prices will vary significantly from the underlying NAV of the Fund, which may be heightened during periods of market disruption or volatility. Similarly, Shares may trade at a wider bid/ask spread than shares of traditional ETFs and may therefore be more costly for investors to trade, which may be heightened during periods of market disruption or volatility. "Bid" refers to the highest price a buyer will pay to buy a specified number of shares of a stock at any given time. "Ask" refers to the lowest price at which a seller will sell the stock. The difference between the bid price and the ask price is called the "spread." Additionally, the Portfolio Reference Basket structure itself may result in additional trading costs because the Fund may receive or deliver holdings in different weightings on any given day than the weightings of the Fund's Actual Portfolio, which may result in portfolio turnover, and related transaction costs, to re-align the Actual Portfolio with the Fund's intended investment strategy. In addition, although the Fund seeks to benefit from keeping its Actual Portfolio secret, market participants may attempt to use the Portfolio Reference Basket to identify the Fund's trading strategy, which if successful, could result in such market participants engaging in certain predatory practices, such as front-running the Fund's trading activity or free-riding on the Fund's investment strategy, that may potentially harm the Fund and its shareholders. There can be no assurance that the Portfolio Reference Basket structure will operate as intended. The Portfolio Reference Basket structure is novel and not yet proven as an effective arbitrage mechanism. The effectiveness of the Portfolio Reference Basket structure as an arbitrage mechanism is contingent upon, among other things, the effectiveness of the proprietary algorithmic process employed to create a Portfolio Reference Basket that performs in a manner substantially identical to the performance of the Fund's Actual Portfolio and the willingness of authorized participants and other market participants to trade based on the Portfolio Reference Basket. Although the Fund provides an independent third party with information to generate the Portfolio Reference Basket, the Fund is not involved in the actual calculation of the Portfolio Reference Basket and is not responsible for the calculation or dissemination of the Portfolio Reference Basket. The Fund makes no warranty as to the accuracy of the Portfolio Reference Basket or that it will produce the intended results. In the event that the Portfolio Reference Basket structure does not result in effective arbitrage opportunities in the Fund Shares, the Fund may exhibit wider premiums/discounts, bid/ask spreads and tracking error (relative to the Actual Portfolio) than traditional ETFs. For at least the first three years after launch of the Fund, if the tracking error exceeds 1%, or if, for 30 or more days in any quarter or 15 days in a row, the absolute difference between either the closing price or the Bid/Ask Price, on one hand, and NAV, on the other, exceeds 2.00% or the bid/ask spread exceeds 2.00%, the Adviser will recommend appropriate remedial measures to the Fund's Board of Directors for its consideration, which may include, but are not limited to, liquidation of the Fund.

Portfolio Turnover Risk. Each Fund may engage in active and frequent trading, resulting in high portfolio turnover. This may lead to the realization and distribution to shareholders of higher capital gains, increasing their tax liability. Frequent trading may also increase transaction costs, which could detract from a Fund's performance.

Small-Capitalization Companies Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* The SGI Dynamic Tactical ETF may invest in Underlying Funds which may invest in small-capitalization companies. Small-capitalization companies may be more volatile than, and not as readily marketable as, those of larger companies. Small companies may also have limited product lines, markets or financial resources and may be dependent on relatively small or inexperienced management groups. Additionally, the trading volume of small-cap company securities may make them more difficult to sell than those of larger companies. Moreover, the lack of an efficient market for the securities may make them difficult to value. Furthermore, while securities of small capitalization companies may offer greater opportunity for capital appreciation than larger companies, investment in such companies presents greater risks than investment in larger, more established companies. Indeed, historically, small capitalization stocks have been more volatile in price than larger capitalization stocks. Among the reasons for the greater price volatility of these securities are the lower degree of liquidity in the markets for such stocks, and the potentially greater sensitivity of such small companies to changes in or failure of management, and to many other changes in competitive, business, industry and economic conditions, including risks associated with limited product lines, markets, management depth, or financial resources. Besides exhibiting greater volatility, small company stocks may, to a degree, fluctuate independently of larger company stocks. Small company stocks may decline in price as large company stocks rise, or rise in price as large company stocks decline. Additionally, while the markets in securities of small companies have grown rapidly in recent years, such securities may trade less frequently and in smaller volume than more widely held securities. The values of these securities may fluctuate more sharply than those of other securities, and

Underlying Funds may experience some difficulty in establishing or closing out positions in these securities at prevailing market prices. There may be less publicly available information about the issuers of these securities or less market interest in such securities than in the case of larger companies, and it may take a longer period of time for the prices of such securities to reflect the full value of their issuers' underlying earnings potential or assets.

Underlying Funds Risk. *(Only a principal risk of the SGI Dynamic Tactical ETF)* The SGI Dynamic Tactical ETF's investments in Underlying Funds may result in duplication of expenses, including advisory fees, in addition to each Fund's own expenses. The risk of owning an Underlying Fund generally reflects the risks of owning the underlying investments the Underlying Fund holds. The SGI Dynamic Tactical ETF may incur brokerage fees in connection with its purchase of ETF shares. When the SGI Dynamic Tactical ETF invests in an Underlying Fund, the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities comprising the Underlying Fund or index on which the ETF or index mutual fund is based and the value of a Fund's investments will fluctuate in response to the performance and risks of the underlying investments or index. Since the SGI Dynamic Tactical ETF invests in other investment companies that invest in equity securities, risks associated with investments in other investment companies will include stock market risk. In addition to the brokerage costs associated with the Underlying Fund's purchase and sale of the underlying securities, ETFs and mutual funds incur fees that are separate from those of the SGI Dynamic Tactical ETF. As a result, the SGI Dynamic Tactical ETF's shareholders will indirectly bear a proportionate share of the operating expenses of the ETFs and mutual funds, in addition to Fund expenses. Because the SGI Dynamic Tactical ETF is not required to hold shares of Underlying Funds for any minimum period, it may be subject to, and may have to pay, short-term redemption fees imposed by the Underlying Funds. The SGI Dynamic Tactical ETF has no control over the investments and related risks taken by the Underlying Funds in which they invest.

The Fund's investment in Underlying Funds may have the effect of creating economies of scale, possibly resulting in lower expense ratios for the Underlying Funds, because the Fund may own substantial portions of the shares of the Underlying Funds. However, redemption of the Underlying Fund shares by the Fund could cause the expense ratio of an Underlying Fund to increase, as its fixed costs would be spread over a smaller asset base. Because of large positions of the Fund, the Underlying Funds may experience relatively large inflows and outflows of cash due to the Fund's purchases and sales of Underlying Fund shares. Although the Adviser may seek to minimize the impact of these transactions where possible, for example, by structuring them over a reasonable period of time or through other measures, Underlying Funds may experience increased expenses as they buy and sell portfolio securities to manage the cash flow effect related to these transactions. Further, when the Adviser structures transactions over a reasonable period of time in order to manage the potential impact of the buy and sell decisions for the Fund, the Fund may pay more or less (for purchase activity) or receive more or less (for redemption activity), for shares of the Underlying Funds than if the transactions were executed in one transaction. In addition, substantial redemptions by the Fund within a short period of time could require the Underlying Fund to liquidate positions more rapidly than would otherwise be desirable, which may have the effect of reducing or eliminating potential gain or causing it to realize a loss. Substantial redemptions may also adversely affect the ability of the Underlying Fund to implement its investment strategy.

Temporary Investments. Each Fund may depart from its principal investment strategy in response to adverse market, economic, political or other conditions by taking a temporary defensive position (up to 100% of its assets) in cash, cash equivalents and all types of money market and short-term debt securities. The value of money market instruments tends to fall when current interest rates rise. Money market instruments are generally less sensitive to interest rate changes than longer-term securities. If a Fund were to take a temporary defensive position, it may be unable to achieve its investment objective for a period of time.

The Funds may make other types of investments and may engage in various other investment practices. These investments and practices, and their risks, are described in the SAI.

MANAGEMENT OF THE FUNDS

The Board of The RBB Fund, Inc. (the “Company”), of which each Fund is a series, is responsible for supervising the operations and affairs of the Funds. The Adviser is responsible for the daily management and administration of each Fund’s operations.

Investment Adviser

The Adviser’s principal address is 620 South Main Street, Bountiful, Utah 84010. The Adviser provides investment management and investment advisory services to investment companies and other institutional accounts. The Adviser is 100% privately-owned, and was founded in 2010.

Subject to the overall supervision of the Board, the Adviser manages the overall investment operations of the Funds in accordance with each Fund’s investment objective and policies and formulates a continuing investment strategy for each Fund pursuant to the terms of investment advisory agreements between the Company and the Adviser (each, an “Advisory Agreement” and together, the “Advisory Agreements”). Under the terms of its Advisory Agreement, each Fund pays the Adviser a unitary management fee that is computed and paid monthly at an annual rate of 0.85% and 0.95% of the average daily net assets of the SGI U.S. Large Cap Core ETF and SGI Dynamic Tactical ETF, respectively, during the month. From the unitary management fees, the Adviser pays most of the expenses of the Funds, including the cost of sub-advisory fees to any investment sub-adviser, transfer agency, custody, fund administration, legal, audit and other services. However, under each Advisory Agreement, the Adviser is not responsible for interest expenses, brokerage commissions and other trading expenses, taxes and other extraordinary costs such as litigation and other expenses not incurred in the ordinary course of business. For the fiscal year ended August 31, 2023, the Funds paid to the Adviser for its services, the following:

	Advisory Fee Received
SGI U.S. Large Cap Core ETF	0.85%
SGI Dynamic Tactical ETF	0.95%

Investment Sub-Adviser

SG Trading Solutions, LLC, the investment sub-adviser to the Funds, is located at 620 South Main Street, Bountiful, Utah 84010. The Sub-Adviser is an affiliate of the Adviser. The Sub-Adviser implements rigorous quantitative and fundamental analysis to achieve best execution, and is subject to oversight by the Adviser and the Board. Under the Sub-Advisory Agreement, the Sub-Adviser receives a fee from the Adviser, calculated daily and paid monthly, equal to 0.05% of the average daily net assets of each Fund.

A discussion regarding the Board’s initial approval of each Fund’s Advisory Agreement and Sub-Advisory Agreement and the factors the Board considered with respect to their approval is available in the Funds’ annual report to shareholders for the fiscal year ended August 31, 2023.

Portfolio Managers

The Adviser

David Harden, the President of the Adviser, is primarily responsible for the day-to-day management of each Fund’s investment portfolio. Mr. Harden founded the Adviser in 2010. He started his career in 1993 and has worked for such firms as Fidelity Investments, Wellington Management and Evergreen Investments. From 2007 to 2012, Mr. Harden worked with Ensign Peak Advisors, Inc., most recently as Vice President and Senior Portfolio Manager, where he managed and oversaw day-to-day research, portfolio management and trading for all index, quantitative and low volatility strategies.

Aash Shah is a Portfolio Manager of the Adviser and is responsible for the day-to-day management of each Fund’s investment portfolio. Mr. Shah joined the Adviser in 2017 as a Portfolio Manager. Mr. Shah has over 26 years of investment management experience including over 21 years as a portfolio manager. Previously, Mr. Shah managed small, mid, and large cap funds for Federated Investors in both New York City and Pittsburgh. Mr. Shah also managed private client

portfolios for Key Bank in Denver prior to joining the Adviser. Mr. Shah has a Bachelor's degree from the University of Pittsburgh Swanson School of Engineering and an MBA in Finance and Accounting from the Tepper School at Carnegie Mellon University. He also holds a CFA charter.

The SAI provides additional information about the compensation of each Portfolio Manager, other accounts managed by them, and their ownership of Shares of the Funds.

HOW TO BUY AND SELL SHARES

Each Fund issues and redeems its Shares at NAV only in Creation Units. Only APs may acquire Shares directly from a Fund, and only APs may tender their Shares for redemption directly to a Fund, at NAV. APs must be (i) a broker-dealer or other participant in the clearing process through the Continuous Net Settlement System of the National Securities Clearing Corporation, a clearing agency that is registered with the SEC; or (ii) a DTC participant (as discussed below). In addition, each AP must execute a Participant Agreement that has been agreed to by the Distributor, and that has been accepted by the Transfer Agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Investors can only buy and sell Shares in secondary market transactions through brokers. Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling a Fund's Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

Book Entry

Shares are held in book-entry form, which means that no stock certificates are issued. The Depository Trust Company ("DTC") or its nominee is the record owner of all outstanding Shares.

Investors owning a Fund's Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC's participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or "street name" through your brokerage account.

Share Trading Prices on the Exchange

Trading prices of a Fund's Shares on the Exchange may differ from the Fund's daily NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares. Neither the Fund nor the Exchange intends to disseminate the approximate share value of a Fund's Portfolio Reference Basket or Proxy Portfolio, but arbitrageurs and market participants could use the component securities in a Fund's Portfolio Reference Basket or Proxy Portfolio to calculate intraday values that approximate the value of the Actual Portfolio (the "intraday indicative value" or "IIV"). Intraday pricing information for all constituents of the Portfolio Reference Basket or Proxy Portfolio for a Fund that are exchange-traded, which includes all eligible instruments except cash and cash equivalents, is available on the exchanges on which they are traded or through major market data vendors or subscription services. Intraday pricing information for cash equivalents is available through major market data vendors, subscription services and/or pricing services. Any such IIV should not be viewed as a "real-time" update of the NAV per share of a Fund because (i) the IIV is not calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day, (ii) the calculation of NAV may be subject to fair valuation at different prices than those used in the calculations of the IIV, (iii) unlike the calculation of NAV, the IIV does not take into account a Fund's expenses, and (iv) the IIV is based on the Portfolio Reference Basket or Proxy Portfolio and not on a Fund's Actual Portfolio. The Funds are not involved in or responsible for any aspect of the calculation or dissemination of the IIVs and makes no representation or warranty as to the accuracy of the IIVs.

Frequent Purchases and Redemptions of Shares

The Funds impose no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Funds, are an essential

part of the ETF process and help keep share trading prices in line with NAV. As such, the Funds accommodate frequent purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains or losses. To minimize these potential consequences of frequent purchases and redemptions, the Funds employ fair value pricing and impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Funds in effecting trades. In addition, the Funds reserve the right to reject any purchase order at any time.

Determination of Net Asset Value

Each Fund's NAV is calculated as of the scheduled close of regular trading on the NYSE, generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for a Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, a Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates by the Funds' Valuation Designee (defined below) under guidelines established by the Board.

Fair Value Pricing

If market quotations are unavailable or deemed unreliable by the Funds' administrator, in consultation with the Adviser, securities will be fair valued by the Adviser, as the Funds' valuation Designee (the "Valuation Designee") in accordance with procedures adopted by the Board and under the Board's ultimate supervision. Relying on prices supplied by pricing services or dealers or using fair valuation involves the risk that the values used by a Fund to price its investments may be higher or lower than the values used by other investment companies and investors to price the same investments. The Board has adopted a pricing and valuation policy for use by each Fund and its Valuation Designee in calculating the Fund's NAV. Pursuant to Rule 2a-5 under the 1940 Act, each Fund has designated the Adviser as its "Valuation Designee" to perform all of the fair value determinations as well as to perform all of the responsibilities that may be performed by the Valuation Designee in accordance with Rule 2a-5. The Valuation Designee is authorized to make all necessary determinations of the fair values of portfolio securities and other assets for which market quotations are not readily available or if it is deemed that the prices obtained from brokers and dealers or independent pricing services are unreliable.

DIVIDENDS, DISTRIBUTIONS, AND TAXES

Dividends and Distributions

Each Fund intends to pay out dividends, if any, and distribute any net realized capital gains to its shareholders at least annually.

Dividend Reinvestment Service

Brokers may make the DTC book-entry dividend reinvestment service available to their customers who own Shares. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole Shares of a Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. In order to achieve the maximum total return on their investments, investors are encouraged to use the dividend reinvestment service. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require a Fund's shareholders to adhere to specific procedures and timetables.

Taxes

As with any investment, you should consider how your investment in shares of a Fund will be taxed. The tax information in this Prospectus is provided as general information. Except where otherwise indicated, the discussion relates to investors who are individual United States citizens or residents. You should consult your own tax professional about the tax consequences of an investment in shares of a Fund.

Unless your investment in shares of a Fund is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when: (i) the Fund makes distributions; (ii) you sell your shares listed on the Exchange; and (iii) you purchase or redeem Creation Units.

Taxes on Distributions

Each Fund intends to distribute, at least annually, substantially all of its net investment income and net capital gains income. For federal income tax purposes, distributions of investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of capital gains (if any) are determined by how long a Fund owned the investments that generated them, rather than how long a shareholder has owned his or her shares of the Fund. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by a Fund for one year or less generally result in short-term capital gains and losses. Distributions of a Fund's net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by a Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains, which for non-corporate shareholders are subject to tax at reduced rates. Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares.

Distributions reported by a Fund as "qualified dividend income" are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided holding period and other requirements are met. "Qualified dividend income" generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that a Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. The amount of a Fund's distributions that qualify for this favorable treatment may be reduced as a result of the Fund's securities lending activities, if any. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from a Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The amount of the dividends qualifying for this deduction may, however, be reduced as a result of a Fund's securities lending activities, if any.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from a Fund.

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% Medicare contribution tax on all or a portion of their “net investment income,” which includes interest, dividends, and certain capital gains (including capital gains distributions and capital gains realized on the sale of shares of a Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by a Fund before your investment (and thus were included in the shares’ NAV when you purchased your shares of the Fund).

You may wish to avoid investing in a Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable to you even though it may economically represent a return of a portion of your investment. This adverse tax result is known as “buying into a dividend.”

Taxes When Shares are Sold on the Exchange

For federal income tax purposes, any capital gain or loss realized upon a sale of shares of a Fund generally is treated as a long-term capital gain or loss if those shares have been held for more than 12 months and as a short-term capital gain or loss if those shares have been held for 12 months or less. However, any capital loss on a sale of shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such shares of a Fund. Any loss realized on a sale will be disallowed to the extent shares of a Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of shares. If disallowed, the loss will be reflected in an upward adjustment to the basis of the shares acquired.

IRAs and Other Tax-Qualified Plans

The one major exception to the preceding tax principles is that distributions on and sales of shares of a Fund held in an IRA (or other tax-qualified plan) will not be currently taxable unless it borrowed to acquire the shares.

U.S. Tax Treatment of Foreign Shareholders

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by a Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. Each Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Foreign shareholders will generally not be subject to U.S. tax on gains realized on the sale of shares in a Fund, except that a nonresident alien individual who is present in the United States for 183 days or more in a calendar year will be taxable on such gains and on capital gain dividends from a Fund.

However, if a foreign investor conducts a trade or business in the United States and the investment in a Fund is effectively connected with that trade or business, then the foreign investor’s income from a Fund will generally be subject to U.S. federal income tax at graduated rates in a manner similar to the income of a U.S. citizen or resident.

Each Fund is generally required to withhold 30% on certain payments to shareholders that are foreign entities and that fail to meet prescribed information reporting or certification requirements.

All foreign investors should consult their own tax advisors regarding the tax consequences in their country of residence of an investment in a Fund.

Backup Withholding

Each Fund (or a financial intermediary, such as a broker, through which a shareholder owns shares of the Fund) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that he, she or it is not subject to such backup withholding. The current backup withholding rate is 24%.

Taxes on Purchases and Redemptions of Creation Units

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the AP's aggregate basis in the securities surrendered plus the amount of cash paid for such Creation Units. The Internal Revenue Service ("IRS"), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Any gain or loss realized by an AP upon a creation of Creation Units will be treated as capital gain or loss if the AP holds the securities exchanged therefor as capital assets, and otherwise will be ordinary income or loss. Any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if the securities exchanged for such Creation Units have been held by the AP for more than 12 months, and otherwise will be short-term capital gain or loss.

The Company on behalf of each Fund has the right to reject an order for a purchase of Creation Units if the AP (or a group of APs) would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of a Fund and if, pursuant to Section 351 of the Code, the Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Company also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If a Fund does issue Creation Units to an AP (or group of APs) that would, upon obtaining the Creation Units so ordered, own 80% or more of the outstanding shares of the Fund, the AP (or group of APs) may not recognize gain or loss upon the exchange of securities for Creation Units.

An AP who redeems Creation Units will generally recognize a gain or loss equal to the difference between the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units and the AP's basis in the Creation Units. Any gain or loss realized by an AP upon a redemption of Creation Units will be treated as capital gain or loss if the AP holds the shares comprising the Creation Units as capital assets, and otherwise will be ordinary income or loss. Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the shares comprising the Creation Units have been held by the AP for more than 12 months, and otherwise will generally be short-term capital gain or loss. Any capital loss realized upon a redemption of Creation Units held for six months or less will be treated as a long-term capital loss to the extent of any amounts treated as distributions to the applicable AP of long-term capital gains with respect to the Creation Units (including any amounts credited to the AP as undistributed capital gains).

Each Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. A Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, a Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in a Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of shares of a Fund. Consult your personal tax advisor about the potential tax consequences of an investment in Shares of a Fund under all applicable tax laws. For more information, please see the section entitled "DIVIDENDS, DISTRIBUTIONS, AND TAXES" in the SAI.

DISTRIBUTION

The Distributor, Quasar Distributors, LLC, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Funds on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Funds or the securities that are purchased or sold by the Funds. The Distributor's principal address is 111 East Kilbourn Avenue, Suite 2200, Milwaukee, Wisconsin 53202.

ADDITIONAL CONSIDERATIONS

Payments to Financial Intermediaries

The Adviser and Sub-Adviser, out of their own resources and without additional cost to the Funds or their shareholders, may pay intermediaries, including affiliates of the Adviser and Sub-Adviser, for the sale of Fund Shares and related services, including participation in activities that are designed to make intermediaries more knowledgeable about exchange traded products. Payments are generally made to intermediaries that provide shareholder servicing, marketing and related sales support, educational training or support, or access to sales meetings, sales representatives and management representatives of the intermediary. Payments may also be made to intermediaries for making Shares of a Fund available to their customers generally and in investment programs. The Adviser and Sub-Adviser may also reimburse expenses or make payments from its own resources to intermediaries in consideration of services or other activities the Adviser and/or Sub-Adviser believes may facilitate investment in the Funds.

The possibility of receiving, or the receipt of, the payments described above may provide intermediaries or their salespersons with an incentive to favor sales of Shares of the Funds, and other funds whose affiliates make similar compensation available, over other investments that do not make such payments. Investors may wish to take such payment arrangements into account when considering and evaluating any recommendations relating to the Funds and other ETFs.

Premium/Discount Information

Information regarding how often each of the Fund's Shares traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV is available, free of charge, on the Funds' website at www.sgi.com.

Continuous Offering

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Funds on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the Prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into individual Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the Investment Company Act of 1940, as amended. As a result, broker-dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with Shares that are part of an over-allotment within the meaning of Section 4(a)(3) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares of a Fund are reminded that under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that such Fund's Prospectus is available on the SEC's electronic filing system. The prospectus delivery mechanism provided in Rule 153 of the Securities Act is only available with respect to transactions on an exchange.

Semi-Transparent Structure

Each Fund is a semi-transparent actively managed ETF that operates pursuant to an SEC exemptive order. In many respects the Funds operate similarly to traditional ETFs. For example, as described in this Prospectus, shares of a Fund are generally purchased and redeemed in Creation Unit aggregations through authorized participants, Shares of the Funds are listed and traded on a stock exchange, and individual investors can purchase or sell shares in less than Creation Unit sizes and for cash in the secondary market through a broker. A Fund's Creation Units generally can be purchased or redeemed in-kind and/or for cash in exchange for the Portfolio Reference Basket/Proxy Portfolio.

However, each Fund has some novel features that differentiate it from traditional ETFs. As described above, each Fund does not disclose its complete portfolio holdings each business day, and instead, the Fund discloses other information to the market that is designed to facilitate arbitrage opportunities in Fund Shares to maintain efficient secondary market trading of Shares. On each business day before the commencement of trading in Shares on the listing exchange, each Fund publishes on its website a Portfolio Reference Basket or Proxy Portfolio that is designed to closely track the daily performance of the Fund's Actual Portfolio.

SGI U.S. Large Cap Core ETF. Unlike traditional ETFs, this Fund does not disclose its portfolio holdings (Actual Portfolio) daily. The Fund instead posts a "Proxy Portfolio" on its website each day, including the following information for each portfolio holding in the Proxy Portfolio: (1) ticker symbol; (2) CUSIP or other identifier; (3) description of holding; (4) quantity of each security or other asset held; and (5) percentage weight of the holding in the Proxy Portfolio. The Proxy Portfolio is designed to reflect the economic exposures and risk characteristics of the Fund's actual holdings on each trading day, but it is not the same as the Fund's Actual Portfolio. The Fund will disclose its Actual Portfolio quarterly with a 60-day lag via periodic filings with the Securities and Exchange Commission. The Proxy Portfolio disclosures will enable arbitrageurs and market participants to use the component securities and their weightings in the Proxy Portfolio to calculate intraday values that approximate the value of the securities in the Actual Portfolio and, based thereon, assess whether the market price of the shares is higher or lower than the approximate contemporaneous value of the Actual Portfolio and engage in arbitrage and hedging activities. These activities should ensure that Fund market prices remain close to the Fund's NAV per share. At the end of each trading day, the Fund will calculate the percentage weight overlap between the Proxy Portfolio and the Actual Portfolio (Proxy Overlap) and the standard deviation over the past three months of the daily proxy spread (*i.e.*, the difference, in percentage terms, between the Proxy Portfolio per share NAV and that of the Actual Portfolio at the end of the trading day) (Tracking Error) and publish such information before the opening of trading each Business Day. The Proxy Overlap and Tracking Error will provide additional information to the market making community. In particular, they will help market participants evaluate the risk that the performance of the Proxy Portfolio may deviate from the performance of the portfolio holdings of the Fund. The Fund's Board monitors its Tracking Error and bid/spread. If deviations become too large, the Board will consider the continuing viability of the Fund, whether shareholders are being harmed, and what, if any, corrective measures would be appropriate. See the SAI for further discussion of the Board's monitoring responsibilities.

The Proxy Portfolio is designed to recreate the daily performance of the Actual Portfolio. This is achieved by performing a "Factor Model" analysis of the Actual Portfolio. The Factor Model is comprised of three sets of factors or analytical metrics: market-based factors, fundamental factors, and industry/sector factors. The Fund uses a "Model Universe" to generate its Proxy Portfolio. The Model Universe is comprised of securities that the Fund can purchase and will be a financial index or stated portfolio of securities from which Fund investments will be selected. The results of the Factor Model analysis are then applied to the Model Universe. The daily rebalanced Proxy Portfolio is then generated as a result of this Model Universe analysis with the Proxy Portfolio being a small subset of the Model Universe. The Factor Model is applied to both the Actual Portfolio and the Model Universe to construct the Fund's Proxy Portfolio that performs in a manner substantially identical to the performance of its Actual Portfolio. The Proxy Portfolio will only include investments the Fund is permitted to hold. The Fund's SAI contains more information on the Proxy Portfolio and its construction.

SGI Dynamic Tactical ETF. The Portfolio Reference Basket is comprised of all of the names of the securities in the Fund's Actual Portfolio, and only the securities that are in the Fund's Actual Portfolio (unless cash or cash equivalents are included), although the weightings of such holdings in the Portfolio Reference Basket will differ from the Actual Portfolio. The Portfolio Reference Basket will have a minimum weightings overlap of 90% with the Fund's Actual Portfolio at the beginning of each trading day.

The Portfolio Reference Basket is constructed utilizing a proprietary algorithmic process to minimize daily deviations in return of the Portfolio Reference Basket relative to the Actual Portfolio and is used to facilitate the creation/redemption process and arbitrage. The Portfolio Reference Basket may be updated daily. In determining whether to update the Portfolio Reference Basket, the Adviser and Sub-Adviser will consider various factors, including relative valuation of individual securities, liquidity of the securities in the Portfolio Reference Basket, tracking error of the Portfolio Reference Basket relative to the Actual Portfolio, and the cost to create and trade the Portfolio Reference Basket.

In addition to the disclosure of the Portfolio Reference Basket, the Fund also publishes the Portfolio Reference Basket Disclosures (which include, among other things, the “Guardrail Amount”) on its website on each business day before the commencement of trading in Shares on the Exchange. The Guardrail Amount is the maximum deviation between the weightings of the specific securities in the Portfolio Reference Basket and the weightings of those specific securities in the Actual Portfolio, as well as between the weighting of the respective cash positions. The Guardrail Amount is intended to ensure that no individual security in the Portfolio Reference Basket will be overweighted or underweighted by more than the publicly disclosed percentage when compared to the actual weighting of each security within the Actual Portfolio as of the beginning of each trading day. The Guardrail Amount is designed to help investors evaluate the risk of tracking error, which is the degree to which the performance of the Portfolio Reference Basket deviates from the performance of the Actual Portfolio.

Disclosure of Portfolio Holdings

Shareholders can access information about the Portfolio Reference Basket and Portfolio Reference Basket Disclosures for each business day on www.sgi.com. Each Fund discloses its complete portfolio holdings on www.sgi.com on a quarterly basis with a 60 day lag. Recent information, including information regarding each Fund’s NAV, market price, premiums and discounts, and bid/ask spreads, is also available at www.sgi.com. A description of the Funds’ policies and procedures with respect to the disclosure of a Fund’s portfolio securities is available in the Funds’ SAI.

Additional Information

The Funds enter into contractual arrangements with various parties, including, among others, the Funds’ investment adviser and investment sub-adviser, who provide services to the Funds. Shareholders are not parties to, or intended (or “third party”) beneficiaries of, those contractual arrangements.

The Prospectus and the SAI provide information concerning the Funds that you should consider in determining whether to purchase Shares of a Fund. The Funds may make changes to this information from time to time. Neither this Prospectus nor the SAI is intended to give rise to any contract rights or other rights in any shareholder, other than any rights conferred explicitly by federal or state securities laws that may not be waived.

NO PERSON HAS BEEN AUTHORIZED TO GIVE ANY INFORMATION OR MAKE ANY REPRESENTATIONS NOT CONTAINED IN THIS PROSPECTUS OR IN THE FUNDS’ SAI INCORPORATED HEREIN BY REFERENCE, IN CONNECTION WITH THE OFFERING MADE BY THIS PROSPECTUS AND, IF GIVEN OR MADE, SUCH REPRESENTATIONS MUST NOT BE RELIED UPON AS HAVING BEEN AUTHORIZED BY THE COMPANY OR ITS DISTRIBUTOR. THIS PROSPECTUS DOES NOT CONSTITUTE AN OFFERING BY THE COMPANY OR BY THE DISTRIBUTOR IN ANY JURISDICTION IN WHICH SUCH OFFERING MAY NOT LAWFULLY BE MADE.

FINANCIAL HIGHLIGHTS

The following financial highlights tables are intended to help you understand each Fund's financial performance for the period of its operations. Certain information reflects financial results for a single Share. Total returns in the tables represent the rate an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all dividends and distributions). The financial information for the periods shown has been audited by Ernst & Young LLP, the independent registered public accounting firm, which is available upon request. This information should be read in conjunction with the Funds' financial statements, which, together with the report of the independent registered public accounting firm, are included in the Funds' annual report for the fiscal year ended August 31, 2023 and is available at no cost upon request (see back cover for ordering instructions).

	FOR THE PERIOD ENDED AUGUST 31 2023 ⁽¹⁾
SGI U.S. Large Cap Core ETF	
PER SHARE OPERATING PERFORMANCE	
Net asset value, beginning of period	\$ 25.00
Net investment income/(loss) ⁽²⁾	0.11
Net realized and unrealized gain/(loss) from investments	2.90
Net increase/(decrease) in net assets resulting from operations	3.01
Net asset value, end of period	\$ 28.01
Market value, end of period	\$ 28.00
Total investment return/(loss) on net asset value ⁽³⁾	12.03% ⁽⁵⁾
Total investment return/(loss) on market price ⁽⁴⁾	12.00% ⁽⁵⁾
RATIO/SUPPLEMENTAL DATA	
Net assets, end of period (000's)	\$ 98,025
Ratio of expenses to average net assets	0.85% ⁽⁶⁾
Ratio of net investment income/(loss) to average net assets	1.01% ⁽⁶⁾
Portfolio turnover rate	95% ⁽⁵⁾

⁽¹⁾ While the Fund commenced operations on March 30, 2023, the Fund began investing consistent with its investment objective on March 31, 2023.

⁽²⁾ The selected per share data is calculated based on average shares outstanding method for the period.

⁽³⁾ Total investment return/(loss) on net asset value is calculated assuming a purchase of shares on the first day and a sale of shares on the last day of each period reported and includes reinvestments of dividends and distributions, if any.

⁽⁴⁾ Total investment return/(loss) on market price is calculated assuming an initial investment made at the market price on the first day of the period, reinvestment of dividends and distributions at market price during the period and redemption at market price on the last day of the period.

⁽⁵⁾ Not annualized.

FOR MORE INFORMATION

For more information about the Funds, the following documents are available free upon request:

Annual/Semi-Annual Reports

Additional information about the Funds' investments is available in the Funds' annual and semi-annual reports to shareholders. The annual report contains a discussion of the market conditions and investment strategies that significantly affected each Fund's performance during its most recently completed fiscal year. The Funds' annual and semi-annual reports to shareholders is available at the Funds' website at www.sgi-am.com or by calling 1-800-617-0004.

Statement of Additional Information

The Funds' SAI, dated December 31, 2023, has been filed with the SEC. The SAI, which includes additional information about the Funds, may be obtained free of charge at the Funds' website or by calling 800-617-0004. The SAI, as supplemented from time to time, is incorporated by reference into this Prospectus and is legally considered a part of this Prospectus.

TO OBTAIN INFORMATION

The SAI is available, without charge, upon request along with the semi-annual and annual reports. To obtain a free copy of the SAI, semi-annual or annual reports or if you have questions about the Funds:

By Internet

Go to www.sgi-am.com.

By Telephone

Call 1-800-617-0004 or your securities dealer.

By Mail

Write to:

Summit Global Investments Funds
