

4Q | 2023

SGI Global Equity Fund

SGLIX

Objective & Strategy

Seeks long-term capital appreciation.

- Utilizes a **quantitative multi-factor approach** to identify companies that we believe have the potential to outperform.
- Focused fundamental research** that eliminates companies with heightened idiosyncratic risk.
- Dynamic **company-specific constraint process** that seeks to restrict stocks with weak prospects.
- Unique risk management approach that results in a **diversified portfolio with lower standard deviation** than the benchmark over full market cycles.

Performance %

	INCEPTION	SINCE INC.	YTD	3 MO	1 YR	3 YR	5 YR	10 YR
SGLIX	3/31/2009	13.21	13.41	8.33	13.41	4.58	8.14	6.28
MSCI ACWI Min Vol ^{®1}		9.73	8.30	6.59	8.30	3.79	7.08	7.50
MSCI ACWI ^{®2}		11.85	22.76	11.13	22.76	6.24	12.27	8.50

Performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than the performance shown. Current performance may be lower or higher than that shown here. Total annual operating expense ratios, as stated in the current prospectus, are gross/net respectively: SGLIX 1.01%/0.84%. The actual expense ratio is lower due to a contractual expense limitation agreement by the Fund's investment adviser through December 31, 2023. Performance would have been lower without fee waivers in effect. For information about other share classes available, please consult the prospectus. Performance of Fund classes will differ. Please see the prospectus for details. Performance is total return and is annualized for periods greater than one year. For performance current to the most recent month-end, please call 855-744-8500.

Managed Risk Approach™

Managing downside risk is at the core of everything we do. We are driven to find, assess and mitigate potential risks in individual securities, systemically in companies, and across combinations of companies.

We are active managers; our portfolios are designed to help investors flourish in rising markets. But, it's our critical focus on the downside that has historically proven key to pursuing investors' long-term goals.

Summit Global Investments, Adviser

SGI is an SEC-registered investment advisor headquartered in Salt Lake City, Utah, with offices in San Francisco, CA and Boise, ID. The firm serves institutional and individual investors, Registered Investment Advisors, and Family Offices. It is dedicated to creating customized investment solutions and strategies for its clients.

IMPORTANT INFORMATION

Investing involves risk, including possible loss of principal.

Diversification does not eliminate the risk of experiencing investment loss.

Equity securities (stocks) are subject to market, economic, and business risks that will cause their price to rise or fall over time. The net asset value per share of the Fund will fluctuate as the value of the securities in the portfolio change and an investor may lose money. Although the Fund seeks lower volatility, there is no guarantee the Fund will perform as expected. The Fund invests in foreign securities which involve political, economic and currency risks, greater volatility and differences in accounting methods. These risks are greater in emerging markets. The Fund may invest in mid-cap companies, which may be subject to more abrupt or erratic market movements than stocks of larger, more established companies.

You cannot invest directly in an index.

¹**MSCI ACWI® Minimum Volatility Index** is calculated by optimizing the MSCI ACWI Index in USD for the lowest level of volatility (within a given set of constraints). These constraints help maintain index replicability and investability and include index turnover limits, for example, along with minimum and maximum constituent, sector and/or country weights relative to the MSCI ACWI. ²**MSCI All-Country World Index (ACWI)®** A free-float weighted equity index. It captures Large and Mid Capitalization representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. ³**Beta** A measure relative risk. A Beta rating above 1.0 indicates greater volatility than the market. A Beta rating below 1.0 indicates lower volatility than the market. ⁴**Standard Deviation** A statistical measurement showing how widely returns varied over a certain period of time. When a fund has a high standard deviation, the predicted range of performance implies greater volatility. ⁵**Market Capitalization** The total dollar market value of all of a company's outstanding shares. ⁶**Price/Earnings** An equity valuation measure defined as market price per share divided by annual earnings per share. ⁷**Price/Cash Flow** A measure of the market's expectations of a firm's future financial health. Because this measure deals with cash flows, the effects of depreciation and other non-cash factors are removed. ⁸**Price/Book** A ratio used to compare a stock's market value to its book value; calculated by dividing the current closing price by the latest quarter's book value per share. ⁹**Price/Sales** A valuation metric for equities calculated by dividing the company's market cap by the revenue in the most recent year; or, equivalently, divide the per-share stock price by the per-share revenue. ¹⁰**Return on Equity** The amount of net income returned as a percentage of shareholders' equity. Return on equity measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested. Return on Equity = Net Income/Shareholders' Equity.
